SEMINARS/WORKSHOPS

ROOM 602

1:30-2:30 SOLAR PANELS

- Peter Kane - Evergreen Solar

Information on solar thermal (hot water) and solar photovoltaic (electricity). How do they work? How do I go about getting solar on my roof? What will it cost?

3:30-4:30 “THE RED HOUSE ON THE HILL”

Michael LeBlanc - Utile, Inc.

Lessons in geothermal and integrated building systems: A peer to peer discussion with the architect who designed his own geothermal house in Sharon

ROOM 604

2:30-3:30 TIPS FOR THE ULTIMATE GREEN HOME & LAWN - Jackson Madnick & Bart Berkowitz

Extremely useful info on lawn care, having a healthier home & how to slash your home heating, cooling & energy bills by 30% -50%. Learn the secrets of the Red Sox ground crew! Enjoy Starbuck’s coffee & delicious desserts during the talk.

4:30-5:00 SMALL WIND 101

Kelly Muellman - Green Energy Associate

Energy Consumers Alliance of New England

Short presentation and Q&A on how to proceed with a residential wind project and the current state of small wind

projects in MA. Including a step-by-step small wind how-to, an overview of 2008 Cadmus analysis on the performance of installed projects, and outlook for projects in the near future.

ROOM 606

1:30-2:30 EARTH DAY IS EVERYDAY! FOR KIDS

Robin Organ - greenschools

Learn some easy strategies to keep our kids and our planet healthy! This workshop is an introduction on ways to Reduce, Reuse, & Recycle right in your home/school. We will discuss ways to pack a waste-free lunch, shop green, reduce water, energy, resources and \$\$\$\$. Lots of great tips that are easy to apply.

3-4 GREEN CLEANING

Green Cleaning is not just a fad, but rather a necessity. Come and hear/see some of the newest, Greenest, Cleaning advances and make healthier choices for you and your family. This workshop takes an honest look at toxins and chemicals found in every day cleaning products. *We will explore a variety of products found in today’s market. Products are not promoted at this workshop. They are simply used as teaching tools.

4:15-5 WHAT CAN MY SCHOOL DO TO BE MORE GREEN?

We will discuss a variety of strategies your school can implement, and share projects that our organization can bring to your school community.
